

POLARIZER REMOVAL IN A MICRODISPLAY SYSTEM

ABSTRACT OF THE DISCLOSURE

A display module includes a display, a first polarizer and a second polarizer. The polarizers can be located at a distance from the image plane of the display to remove the visibility of optical defects located within the polarizer or between the polarizer and display. The display module can also include at least one lens for magnifying the image produced by the display. The display module can also include a backlight having a first polarizer, a second polarizer and a light source.
